

EXTENDED RANGE Qi CHARGING

NuCurrent's innovative charger is the world's first 15W EPP Qi charger certified to 12mm. This innovation allows designers to mount chargers under thick surfaces, enabling deluxe, space-efficient interiors for marine and RV applications.

Superior Performance

Designed for Marine and RV

- Compatible with both 12V and 24V power systems
- Front-end designed for compliance with ISO 7637-2 and ISO 16750-2
- Works over entire battery voltage range

Extended Range

- Industry-leading charge volume
- Improved spatial freedom for better user experience

Extended Power

- Continuous 15W
- Advanced thermal mitigation and foreign object detection

Technology in Action

Qi Certified for Safety and Interoperability

- **Compatible: Samsung Fast Charge, Apple Fast Charge and MagSafe**
- **Extended Power Profile (EPP) Qi certification ensures:**
 - Safety, verified by third-party testing
 - Interoperability with all Qi devices
 - Future-proof with 15W
- **Charges through thick, non-metallic surfaces**
 - Materials include: fiberglass, marble, wood, and granite
 - Preserves original surface appearance and structural integrity
 - Protects charger from water ingress
 - Allows easy surface sterilization

Solutions Available Today

- Custom and ready-made subsurface and surface mount solutions available for specialized applications
- Manufactured in the U.S. by American Technology Components
